Dana Genuine Off-Highway Product Solutions Increase Uptime

MAUMEE, Ohio – Dana Incorporated delivers customized off-highway drivetrain and motion solutions that ensure peak efficiency and increased uptime for a wide variety of mobile and stationary industrial applications, including construction, agriculture, material handling, mining, and forestry equipment.

“Off-highway vehicles and equipment deliver the greatest value when they are actively working, so when they need repairs, installing OE genuine Dana replacement parts is imperative to keep them operating at peak performance,” said Dan Griffin, senior director, aftermarket and digital solutions for Dana. “Genuine Dana drivetrain and motion systems are designed with lower maintenance requirements to maximize productivity across all off-highway sectors, for both traditional and electrified applications.”

Well known to original-equipment manufacturers and Dana’s aftermarket customers, the off-highway portfolio includes Spicer[®], Spicer Electrified[™], Brevini[™], Spicer Torque-Hub[™], Graziano[™], and GWB[®] and features genuine products designed to provide long life, power, reduced maintenance, and increased uptime. In addition, genuine Dana off-highway products help maintain the cost of ownership expected when acquiring new equipment. Customization options support vehicles and machines with both conventional and electrified power sources, lowering total ownership costs.

“Whether off-highway equipment is in constant motion or working hard in one spot, Dana’s integrated drivetrain and motion systems ensure peak efficiency. No matter the terrain or conditions, we have the right solution with broad coverage across market segments,” said Griffin. “In addition, Dana provides its customers with the security and experience of a large global supplier with localized regional technical support, product development, and manufacturing to enhance the customer experience.”
